APPLICATION OF CELLULAR SYSTEMS IN DRUG METABOLISM AND TOXICITY STUDIES

Foreword – J. Döhmer ix

Part 1. USE OF MICROORGANISMS TO EXPRESS DRUG-METABOLISM AND TOXICITY STUDIES

Heterologous expression of drug-metabolizing enzymes in cellular and whole animal models
A.P. Simula, M.B. Crichton, S.M. Black, S. Pemble, H.F.J. Bligh, J.D. Beggs, C.R. Wolf (Dundee, London and Edinburgh, UK) 3

Expression of human cytochrome P450 enzymes in yeast and bacteria and relevance to studies on catalytic specificity
F.P. Guengerich, E.M.J. Gillam, S. Ohmori, P. Sandhu, W.R. Brian, M.-A. Sari, M. Iwasaki (Nashville, TN) 21

Recombinant yeast in drug metabolism
J.P. Renaud, M.A. Peyronneau, P. Urban, G. Truan, C. Cullin, D. Pompon, Ph. Beaune, D. Mansuy (Paris and Gif-sur-Yvette, France) 39

Immunotoxicology and expression of human cytochrome P450 in microorganisms
Ph. Beaune, M. Bourdi, C. Belloc, J.-C. Gautier, F.P. Guengerich, P. Valadon (Paris, France; Nashville, TN) 53

Saccharomyces cerevisiae: An alternative source for human microsomal liver enzymes and its use in drug interaction studies
H.-P. Eugster, C. Sengstag (Schwerzenbach, Switzerland) 61

Part 2. GENETICALLY ENGINEERED MAMMALIAN CELL LINES AND THEIR APPLICATIONS

Molecular biology of human xenobiotic-metabolizing cytochromes P450: role of vaccinia virus cDNA expression in evaluating catalytic function
F.J. Gonzalez (Bethesda, MD) 77

Human cell lines, derived from AHH-1 TK+/– human lymphoblasts, genetically engineered for expression of cytochromes P450
C.L. Crespi, R. Langenbach, B.W. Penman (Woburn, MA; Research Triangle Park, NC) 89
V79 Chinese hamster cells genetically engineered for cytochrome P450 and their use in mutagenicity and metabolism studies
J. Doehmer (München, Germany) 105
Drug and xenobiotic glucuronidation catalysed by cloned human liver UDP-Glucuronosyltransferases stably expressed in tissue culture cell lines
R. Wooster, T. Ebner, L. Sutherland, D. Clarke, B. Burchell (Dundee, UK) 119
A comparative study of the use of primary Chinese hamster liver cultures and genetically engineered immortal V79 Chinese hamster cell lines expressing rat liver CYP1A1, 1A2 and 2B1 cDNAs in micronucleus assays
S. Ellard, J.M. Parry (Swansea, UK) 131
Establishment of a V79 transfected cell line highly producing recombinant human γ-glutamyltransferase
T. Oster, A. Visvikis, C. Thioudellet, S. Fournel-Gigleux, M. Wellman, G. Siest (Nancy, France) 151
Biotransformation of methylxanthines in mammalian cell lines genetically engineered for expression of single cytochrome P450 isoforms. Allocation of metabolic pathways to isoforms and inhibitory effects of quinolones
U. Fuhr, J. Doehmer, N. Battula, C. Wölfel, I. Flick, C. Kudla, Y. Keita, A. Horst Staib (Frankfurt am Main and Mainz, Germany; Kensington, MD) 169

Part 3. ESTABLISHMENT AND APPLICATION OF SPECIALIZED CELL SYSTEMS

Rat hepatocyte cultures and co-cultures in biotransformation studies of xenobiotics
V. Rogiers, A. Vercruysse (Brussels, Belgium) 193
Use of human hepatocyte cultures for drug metabolism studies
A. Guillouzo, F. Morel, O. Fardel, B. Meunier (Rennes, France) 209
Myeloperoxidase-mediated activation of xenobiotics by human leukocytes
A.H. Hofstra, J.P. Uetrecht (Ontario and Toronto, Canada) 221
Prostaglandin-H synthase containing cell lines as tools for studying metabolism and toxicity of xenobiotics
G.H. Degen (Wuerzburg, Germany) 243
